

Retail E5.2

The New Picking Pallet – Lightweight, Nestable, and Sustainable

The picking pallet Retail E5.2 meets all of the requirements of the food distribution industry and is 100 percent compatible with the predecessor model. Thanks to a comprehensive redesign of the cover structure, the load capacity was significantly increased. The pallet's low weight also ensures that for each truck delivery to the sales floor over 500 kilograms of tare weight and the equivalent CO2 are saved.

Bottom support

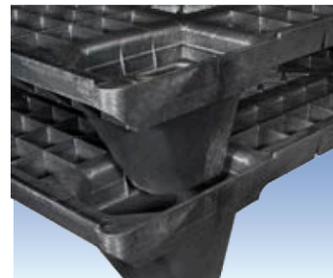

9 feet [9]

Deck options

Open Deck [OD]

A perimetric security rim secures de load

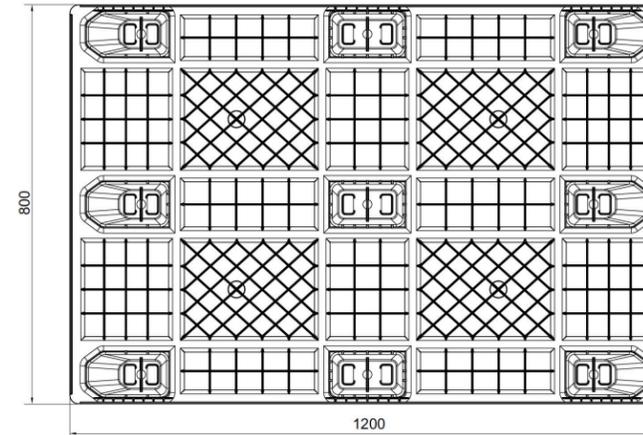

Recycled plastic pallets in the food retail industry
